

Mastermind Logic Bug Resolution

BETA

I am working on the Python CLI Mastermind game from Master-rudra1/20_mastermind. The code in logic.py has a bug where duplicate guessed digits cause inaccurate partial matches (e.g., guessing 1111 against 1234 returns E: 4).

Correcting logic.py duplicate digit feedback >

Why the Bug Occurs

In the original implementation:

Python

```
partial = sum(ch in code for ch in guess) - exact
```
